

MP-HU3VC-H2

HDMI to USB Video Capture Device

All Rights Reserved

Version: MP-HU3VC-H2_2020V1.0

Introduction

The MP-HU3VC-H2 is a HDMI to USB video capture device. The product is designed to capture video and audio signal from the HDMI source. The content captured can be saved to the PC/Laptop through a USB cable.

Features

- Capture video and audio from HDMI sources.
- HDMI video resolution is up to 4K@60Hz 4:4:4, HDR10.
- Supports HDMI loop output for display device connection.
- Capture resolutions up to 1080p at 60 frames per second through USB port.
- Compatible with multiple third-party applications, such as OBS/ VLC/Potplayer/ YouTube on Windows, QuickTime on Mac OS X.
- Supports microphone input and headphone output.
- Powered from USB port, no external power supply required.
- Lower latency.

Package List

Please make sure all the items listed below are in the package. If anything is missing or damaged, please contact your distributor for a replacement.

- 1x MP-HU3VC-H2 HDMI to USB Video Capture Device
- 1x USB Cable
- 1x User Manual

Panel Description

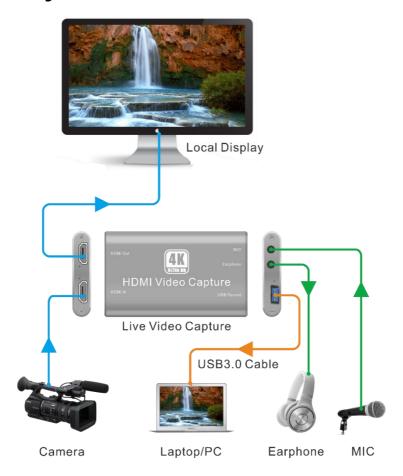

- 1. **HDMI In:** Connects to HDMI source device.
- **2. HDMI Out:** HDMI loop output for HDMI display device connection.
- 3. USB Record: Connects to laptop, PC or other recording device.
- 4. Earphone: Connects to headphone for audio de-embedding.
- 5. MIC: Connects to microphone for audio mixing.

System Connection

System Requirement

- The recording device with available type-A USB port.
- Microsoft Windows, Mac OS X or Linux.
- HDMI audio/video source with HDMI Cable (Camera, Xbox, PS4, DVD...etc.).

RAM: 2GB	1301113		
OS: Windows 7 64bit			

- It is recommended to use the laptop or PC with high performance.
- The OBS studio or Potplayer is recommended to be used for video capture with its lower latency.

Recording for Windows using OBS

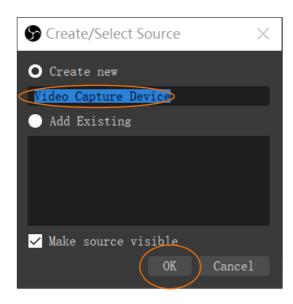

Note: The OBS Player is the first recommended software used for video capturing. Please visit https://obsproject.com/ to download the player for Windows, Mac OS X or Linux.

1. Click the "+" icon at "Sources" zone, and then click "Video Capture Device".

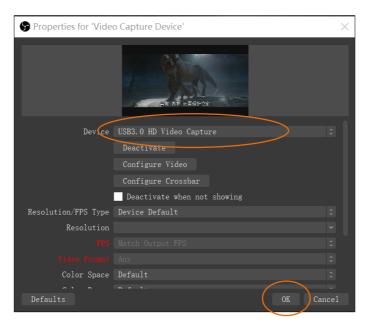

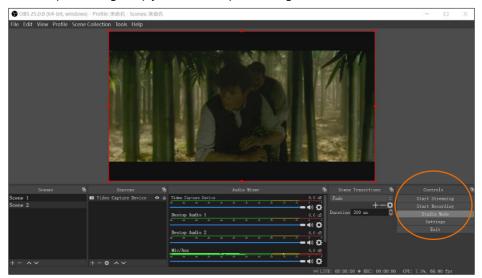

2. Type the new device name, and then click "OK" to create new source.

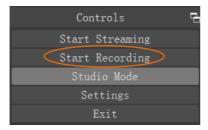

3. Select the video capture device and configure the video parameters, and then click "OK".

- Click "Start Recording" at "Controls" zone, and the video and audio recording will start.
- 5. To stop recording, simply click the "Stop Recording".

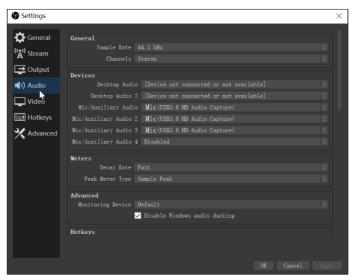

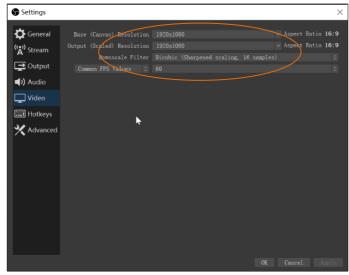

6. Select "File", and then click "Show Recordings" at the top down menu. The saved recording video file can be found.

7. To configure audio and video parameters, click "Settings" at "Controls" zone.

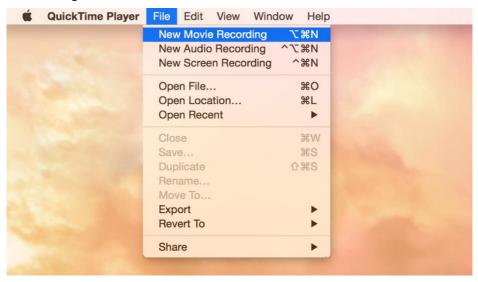

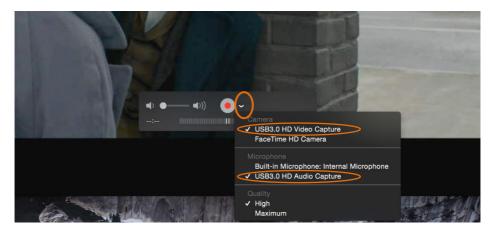

Recording for Mac using QuickTime

The QuickTime Player is the software that comes with Mac PC, it can also be used for video recording.

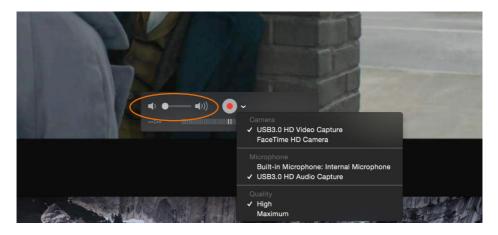

1. Launch QuickTime Player, click "File" at the top menu and select "New Movie Recording".

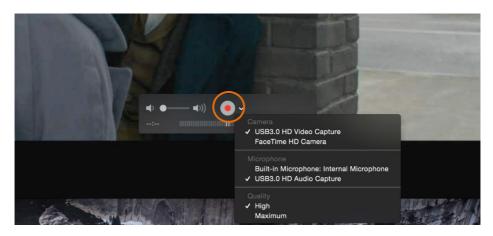

2. The recording control panel will appear on the screen, first click the "v" symbol for the drop down menu.

3. Select "USB3.0 HD Video Capture" under "Camera", and select "USB3.0 HD Audio Capture" under "Microphone". Then adjust to desired volume for the speaker.

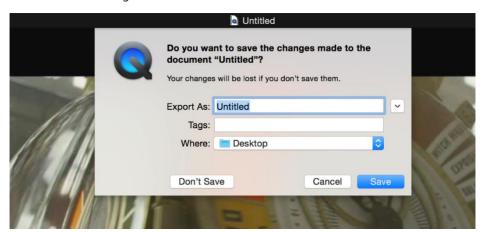

4. Click the "Record" button to start recording.

5. To stop recording, simply click the square "Stop" button.

6. Enter the recording file name and select where to save the file.

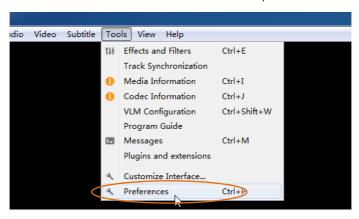

Recording for Windows using VLC VLC Media Player Initial Setting

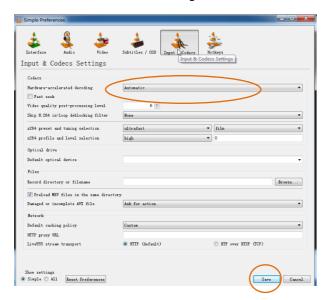

The VLC Media Player also can be used for video capturing. Please visit www.videolan.org/vlc/ to download VLC Media Player for Windows, Mac OS X or Linux.

For initial use, the hardware accelerated decoding must be set at "Automatic" to ensure the best performance. Please following the instructions below to set the hardware accelerated decoding.

1. Select "Tools", and then click on "Preferences" at the drop down menu.

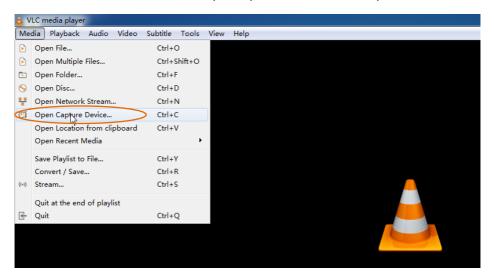

2. Click "Input/Codes", and the select "Automatic" for Hardware-accelerated decoding, and then "Save" to finish the initial VLC setting.

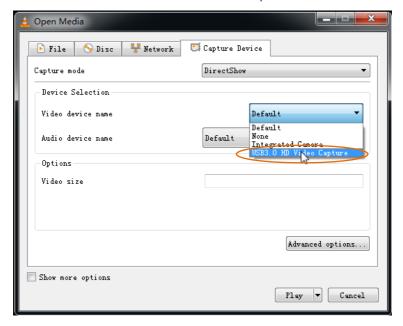

VLC Media Player Direct Show

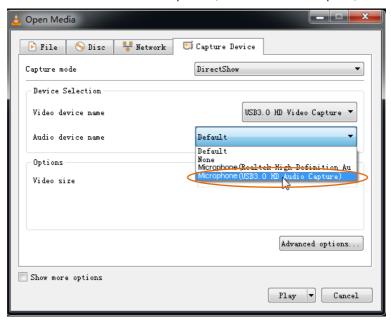

1. Select "Media", and then select "Open Capture Device" at the drop down menu.

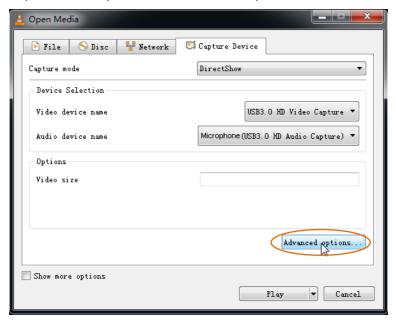

2. For video device name, select "USB3.0 HD Video Capture".

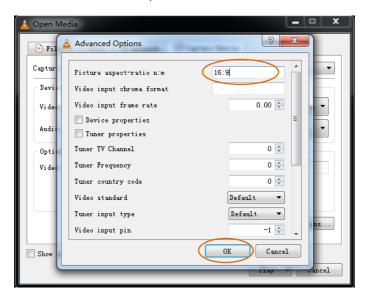

3. For audio device name, select "Microphone (USB3.0 HD Audio Capture)".

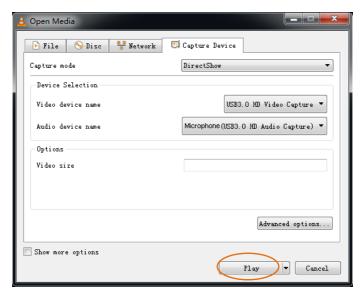

4. To set up the correct aspect ratio, click "Advanced options".

- **5.** Enter the aspect ratio for the video source (e.g. 16:9).
- **6.** Click "OK" to exit the "Advanced options" menu.

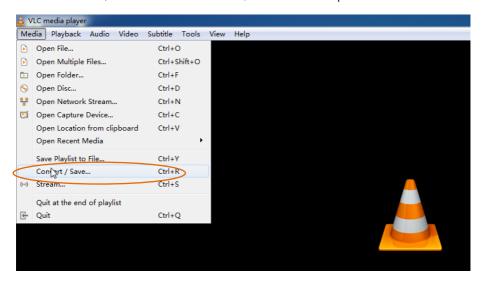

7. Click "Play", the source screen will show in approximately several seconds.

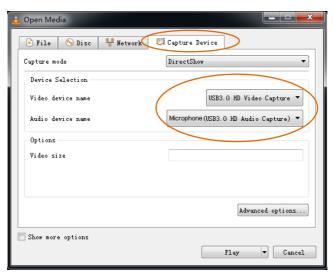

VLC Media Player Recording

Note: We recommend using the "Convert/Save" method to record the video from the device for best performance.

1. Select "Media", and then select "Convert / Save" at the drop down menu.

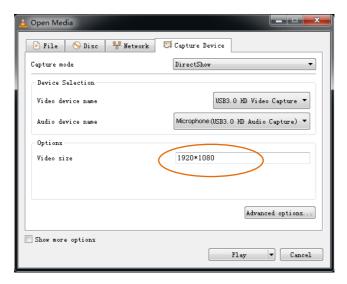

2. Click "Capture Device" tab on the top right side.

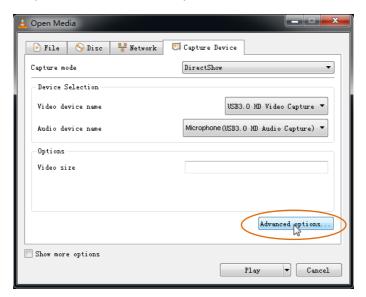

3. Video device name should be "USB3.0 HD Video Capture" and audio device name should be "Microphone (USB3.0 HD Audio Capture)".

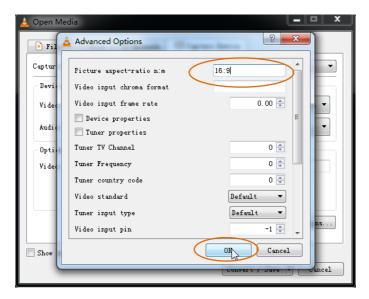

4. To set the video resolution, type the resolution (e.g. 1920*1080) at "Video size" textbox.

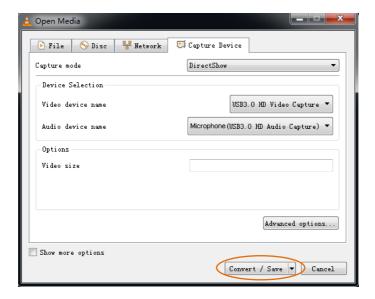

5. To set the aspect ratio, click "Advanced options".

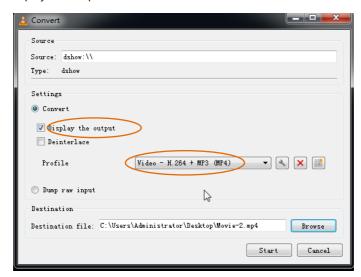

- **6.** Enter the aspect ratio for the video source (e.g. 16:9).
- 7. Click "OK" to exit the "Advanced options" menu.

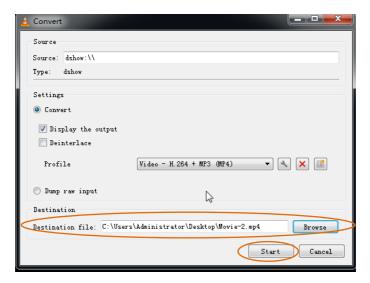

8. Click "Convert / Save".

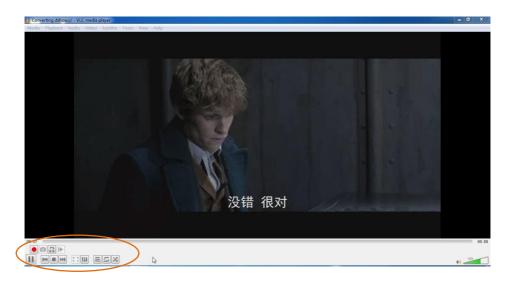

9. Select "Display the output" check-box, and set the video format.

10. Then click "Browse" to choose where to save the destination file and enter the file name.

- **11.**Click "Start", and the video and audio recording will start in approximately several seconds.
- **12.** To stop recording, simply click the square "Stop" button at the bottom control panel.

Specification

Model	MP-HU3VC-H2			
Description	HDMI to USB Video Capture Device			
Input	(1) HDMI In, (1) Microphone			
Input Connector	(1) Type-A HDMI, (1) 3.5mm jack			
Output	(1) HDMI Out, (1) USB Record, (1) Earphone			
Output Connector	(1) Type-A HDMI, (1) Type-A USB, (1) 3.5mm jack			
HDMI Standard	2.0			
HDMI Input Resolution	Up to 4K@60Hz 4:4:4, HDR10			
HDMI Output Resolution	Up to 4K@60Hz 4:4:4, HDR10			
USB Output Color Space	YUV2, RGB			
HDMI Audio Format	LPCM 7.1 audio, Dolby Atmos®, Dolby® TrueHD, Dolby Digital® Plus, DTS:X™, and DTS-HD® Master Audio™ pass-through.
